

PHISHING AWARENESS REPORT

Objective

The objective of this report is to create awareness about phishing attacks, their risks, and preventive measures to protect users from cyber threats.

Introduction

Phishing is a type of cyber attack in which attackers attempt to steal sensitive information such as usernames, passwords, banking details, and personal data by pretending to be a trusted source.

Common Types of Phishing

1. Email Phishing
2. Spear Phishing
3. Smishing (SMS Phishing)
4. Vishing (Voice Phishing)
5. Clone Phishing

Signs of a Phishing Attack

- Suspicious email addresses
- Urgent or threatening messages
- Fake login pages
- Unexpected attachments
- Requests for personal information

Prevention Measures

- Verify sender information.
- Avoid clicking unknown links.
- Use Multi-Factor Authentication (MFA).
- Keep software updated.
- Report suspicious emails.

Conclusion

Phishing attacks remain one of the most common cybersecurity threats. User awareness and safe online practices are essential to prevent data theft and cybercrime.
